

## HIGH BRIGHTNESS SERIES FEATURES

### Incredible Brightness

With brightness ratings up to 7,000 nits, DynaScan high brightness LCDs produce a sunlight viewable image which may easily be seen in storefront windows and other brightly lit environments.

### Superior Color Quality

Each screen is individually color calibrated to the D65 (6500 K) color standard for a correlated color temperature to that of natural daylight.

### Blackening Defect Free

Equipped with high temperature panels capable of withstanding temperatures up to 110°C without blackening - crucial for direct sunlight applications.

### 24/7 Operation

All DynaScan high brightness screens are designed for worry-free round-the-clock operation.

### Low Power Consumption

LED backlighting and ultra efficient cooling systems result in low power consumption and low total cost of ownership.

### Thin Profile

With thicknesses as small as 29mm, DynaScan professional LCDs are among the thinnest in the industry.
